### *Matching Liquid Foundations With BB Creams*

Because our proprietary color matching technology works so well, we are able to create a perfect match between liquid foundations and BB creams. We can even match other makeups on the market.

### *Properties*

Waterproof  
Wear Resistant  
Smooth & Soft Skin Feel  
Blends Easily When Dry  
Peptides Reduce Wrinkles

### **ALL DAY HEALTHY GLOW** With A Single Application

*Specially formulated to resist wear, water, and the sun.*

Our proprietary blend uses microencapsulation to create a silicone and natural oil infusion suspended in a water-based gel that spreads smoothly and evenly. Blends effortlessly with mineral powders and other makeups. Special effect ingredients can accentuate a beautiful, healthy appearance and all day glow. Darker colors can simulate a tan or we can include sunless tanning ingredients for color that lasts for weeks. We include special peptides that make skin appear younger and smoother. Other ingredients reduce the skin's natural oil production rate so fewer touchups are needed. It's so wear resistant it stays on overnight, during sports, or after hours of swimming.

### **OVER 2,500 CUSTOM COLORS** Free Color Matching In 48 Hours

*Choose a color from your computer or send us a sample.*

Our proprietary color matching techniques can match any color the first time without months of development. Select any CMYK or Pantone color and our in-house laboratory can create a matching sample in just a couple business days. Add special effects for a unique color that is exclusively yours.

### **SMALL ARTISAN BATCHES** Bearing Your Own Salon Label

*We manufacture each batch batch by hand in the USA.*

If your product line is large, we can produce up to 3.6 million units per month. If you own an individual salon or small salon chain, we can make as few as 50 units per color in your own label. Our artists can work with you to create full-color digital labels that make your product line stand out. We can even create frosted labels to go onto frosted bottles for no additional charge...something that wasn't possible just a few years ago. Add to your own product line with very little up-front cost. Each batch is made-to-order and each color is preservative-free and never tested on animals.

### **CUSTOM PACKAGING** Stands Out From The Crowd

*We have many packaging options for big and small product lines.*

Many packages are available in volumes as low as 50 units per color. Other options like custom colored plastics require higher minimums but are a cost-effective way to have an entirely unique package. Our team can help you decide which option is best for your company and show you how to control costs while adding as much variety to your product line as you like. Any small company can have a high-end makeup line with a full pallet of custom colors on the shelf in less than 2 weeks or a custom-made package in only 8-10 weeks.
